2. The area defined in Regulation 1 is hereinafter called the "area" and shall be known as the "Nanaimo District Regulated Area."

3. There shall be an Inspector for the area appointed by the Minister of Municipal Affairs.

4. The Inspector shall enforce the provisions of these regulations.

5. Nothing in these regulations shall require the removal, alteration, or abandonment of, nor prevent continuance of the use or occupancy of, an existing building unless in the opinion of the Inspector the building or its use constitutes a hazard to the safety and welfare of the public, or to the owners of adjacent property, or in the opinion of the Medical Health Officer the building or its use constitutes a menace to public health.

#### SUBDIVISIONS.

6. The approving officer as defined in the "Land Registry Act" shall not approve of a plan of subdivision unless, in addition to compliance with section 85 of the "Land Registry Act," there is compliance with the requirements prescribed in Regulations 7 and 8 hereof, except where provision for the relaxation of said regulations is made herein, provided that the approving officer, in cases where he considers strict compliance with the requirements of Regulation 7 would cause undue hardship, may, with the consent of the Inspector, approve a plan of subdivision without compliance with the requirements prescribed in Regulation 7.

7. No land shall be subdivided into lots or parcels for building purposes unless:—

- (a) A method of sewage-disposal satisfactory to the Medical Health Officer is possible for each lot;
- (b) Each lot in a residential district is at least seven thousand five hundred square feet in area and, in addition, is at least sixty feet in width and at least one hundred feet in depth; or in a commercial or industrial district is at least thirty feet in width and at least one hundred

feet in depth. Where the area which it is proposed to subdivide is of such a shape, or the design of an adjoining subdivision is such, that in his opinion a variation from such measurements is justified, the approving officer may approve a plan showing such variation:

- (c) Each lot or parcel resulting from the subdivision abuts on a public highway along one full side of said lot;
- (d) The approving officer is satisfied that the subdivision design is suited to the configuration of the land in and about the area which it is proposed to subdivide, and to the road plan of adjoining subdivisions;
- (e) All road allowances in the subdivision that in the opinion of the approving officer form a part or extension of the major road plan are planned to permit a finished grade not exceeding seven per cent., and all other road allowances in the subdivision are planned to permit a finished grade not exceeding twelve per cent.;
- (f) Road allowances are of the width prescribed in Schedule A hereof for the road category in which they are placed by the approving officer; and in the case of an existing road alongside the proposed subdivision, which is of less width than prescribed for its category as aforesaid, the subdivision plan is designed to provide at least half the difference between the existing width and such prescribed width; provided that where the approving officer requires a greater road width than prescribed in said Schedule A the provisions of this section shall apply with respect to such greater width;
- (g) All road allowances are graded and gravelled and all appurtenant works done to the satisfaction of the approving officer;
- (h) All structures of any kind, including fences, are removed from the road allowances;
- (i) The land is not swamp land and is not subject to intermittent or periodic flooding.

8. The subdivision of land in rural districts into parcels of less than two acres shall not be approved, except on the recommendation in writing of the Board of Appeal.

#### BUILDINGS.

9. (1) Except as provided in subsection (2), no person shall commence the erection of, or an alteration or addition to, or a repair affecting the structural stability of a building or structure in the area without first obtaining a permit in respect thereof from the Inspector.

(2) Where work, commenced before the date of these regulations on a building which does not conform to these regulations or which is intended for a non-conforming use, has been discontinued, such work may be resumed within six months of such date. Sufficient progress in the work shall then be made to the satisfaction of the Inspector, otherwise any further construction or use shall be in conformity with these regulations.

10. No person shall move a building or structure, other than small accessory buildings or structures within a rural district, within or to any part of the area without first obtaining a permit in respect thereof from the Inspector.

11. Before considering an application for a permit, the Inspector shall require the applicant to furnish evidence of compliance with Regulation 7 (g) hereof, and such plans, specifications, and other information as he thinks proper.

12. Except as provided in Regulation 37 hereof, the Inspector shall not issue a permit for any building unless it complies with the requirements of the following clauses:—

- (a) Any building intended for animal or human habitation or as a place where people may congregate, such as a community hall, dance-hall, or similar use, or as a food-catering establishment, shall have provision made for sewage-disposal satisfactory to the Medical Health Officer, and the water-supply shall be satisfactory to the Medical Health Officer:
  - (b) There shall be not more than one dwelling on each seven thousand five hundred square feet of land, except where subdivision into parcels of less area has been made prior to the date of these regulations or as provided for in Regulations 6 and 8 hereof; provided, however, that this shall apply to single- and two-family dwellings only and not to living-quarters forming part of a store or similar commercial use or to multiple dwellings:
  - (c) Structural details shall comply with the National Building Code of the National Research Council of Canada, plumbing installations shall comply with sections K.1.1. to K.6.4.2., inclusive, of Appendix K of said National Building Code; and sewage-disposal systems and septic tanks shall comply with the requirements of Schedule B hereof:
  - (d) Any building intended for human habitation as a single-family dwelling shall have a floor area of not less than five hundred square feet; any building intended for human habitation as a two-family dwelling shall have a floor area of not less than eight hundred square feet; living-quarters above stores or in multiple dwellings shall have a floor area of not less than four hundred square feet per housekeeping unit:
  - (e) The window area in any room intended for use for human habitation shall be at least one-tenth the floor area:
  - (f) Where adequate sewage-disposal and sufficient water facilities are available, every building intended to be used for human habitation shall be provided with at least one sink and one toilet and one bath-tub or shower properly connected to the approved sewage-disposal system:
  - (g) Where land is occupied or is to be occupied by more than three dwellings per acre or by more than three families per acre, if a sufficient water-supply is available, flush-toilets draining into septic tanks or otherwise satisfactory to the Medical Health Officer shall be provided:
  - (h) Where privies are permitted, they shall conform to the requirements of section 16 (f) of the Regulations for the Sanitary Control of Industrial Camps:
  - (i) No open-joint tiling in a sewage-disposal field and no building, other than accessory buildings which the Medical Health Officer considers not likely to cause pollution of water, shall be erected within a less distance than fifty feet from the normal high-water line of any lake, the waters of which are used for swimming or drinking by human beings; nor from any stream draining into such a lake; provided that the prohibition in case of any said stream may be waived at the discretion of the Medical Health Officer.
13. (1) Tourist camps conforming with the regulations made under the "Tourist Camp Regulation Act" shall be exempted from the requirements of Regulation 12 hereof.
- (2) Tourist camps shall be located only on sites approved by the Appeal Board.
- (3) Tourist camps shall not be occupied by other than transient guests or bona-fide tourists without the consent of the Appeal Board.

(4) Any installation, erection, or use of electrical equipment shall be subject to the regulations of the "Electrical Energy Inspection Act."

(5) All structures shall conform with the provisions of the "Fire Marshal Act" and with any regulations pursuant thereto.

(6) No building shall be used for a purpose other than that for which a permit was issued, except with the written permission of the Inspector.

14. The Inspector may withhold a permit for, or order the removal of, any structure, the existence of which is in his opinion contrary to public interest. The Inspector in his order for removal shall name a time by which such structure shall be removed and give the reasons for requiring said removal.

15. If a permittee has not commenced to exercise his rights under the permit within six months from date of issue, the permit shall expire.

16. Where a person obtains a permit, he shall carry out the construction in accordance with the terms on which the permit is based and not otherwise.

17. The Inspector shall have power to enter upon and inspect every building in the course of construction in the area.

18. If any person is erecting a building without a permit, or that is not in accordance with the plans and specifications on which the permit is based, the Inspector may:—

- (a) Order that person to cease building; or
- (b) Order that person to conform to the plans and specifications; or
- (c) Order that person to remove the building within a time-limit to be stated in the order.

19. With the consent of the Appeal Board, the owner of any building that does not conform to the provisions of Regulation 12 hereof may be ordered by the Inspector to make such alterations or additions or do anything that may be necessary to bring said buildings into conformity with said regulation by a date to be specified in the order.

20. Every person to whom an order is directed pursuant to these regulations shall obey the order.

- (c) Accessory buildings located in a rear yard and uses customarily incident to the above uses; provided that a building to shelter domestic animals shall be situated not less than one hundred feet from any well, spring, or creek, and as far from a dwelling on the same lot, and the nearest dwelling on any adjacent lot as the shape and size of the lot on which it is situated permits.

(2) The keeping of animals or fowl for breeding or commercial purposes where such use exists at the date of the coming into effect of these regulations may be continued as a non-conforming use and shall be subject to Regulation 29 hereof, but no similar use shall be established hereafter.

29. (1) Any use of land or buildings contrary to the provisions of Regulations 21 to 28, inclusive, but which existed prior to the coming into effect of these regulations, may be continued, unless in the opinion of the Medical Health Officer and the Inspector such continuance is prejudicial to public health or interest.

(2) No non-conforming use which has been discontinued for thirty days shall be renewed.

(3) The lawful use of a building existing at the time of the coming into effect of these regulations, although such use does not conform to the provisions of Regulations 21 to 28, inclusive, may be extended throughout the building, but no structural alterations shall be made nor shall the non-conforming use be carried beyond the limits of the existing building.

35. In disposing of appeals the Board of Appeal may make such relaxations of these regulations, or of any order issued pursuant to these regulations, as the Board of Appeal considers necessary to ensure substantial justice, except that a change of classification of any district or part thereof may be made only by the Minister of Municipal Affairs on the recommendation of the Board of Appeal.

36. The decision in writing of a majority of the members of the Board of Appeal attending a regularly called meeting shall be the decision of the Board, and the Board shall not be required to readjudicate the same appeal on the same set of facts.

SCHEDULE B.

1. *General.*—Whenever a street or common sewer is not available, any sanitary house sewer shall be connected to a private sewage-disposal system. Such system shall consist of a septic tank with a tile disposal-field or other approved means of disposal.

2. *Location.*—Any septic or other sewage-disposal tank shall be located outside and be separated from any wall of a dwelling-house. Any disposal-field or area shall be located as far as practicable from any dwelling, and in no case shall disposal tiles be nearer at any point than ten feet to any dwelling. No sewage-disposal system shall be so located that it is liable to contaminate any existing domestic water-supply nor shall it be located under any roadway or traffic way.

3. *Materials.*—The walls and floors of any septic tank or other sewage-disposal tank shall be of substantial water-tight construction.

4. *Capacity.*—No septic tank or other sewage-disposal tank shall have a capacity, below the invert of the outlet pipe, of less than four hundred gallons, and shall be constructed according to plans and specifications to be seen in or obtained from the office of the Inspector, or shall be constructed according to other specifications submitted to and approved by the Inspector.

Adequate provision shall be made for any condition that may result in a flow of sewage greater than four hundred gallons per day in any dwelling or fifteen gallons per person per day in any school or similar establishment. When computations or assumptions are made as to the expected flow of sewage, the septic tank shall be sufficiently large to allow a detention period of twenty-four hours and shall contain in addition a reasonable space for sludge storage.

5. *Design.*—The digestion or treatment and dosing chambers of any septic tank or other sewage-disposal tank shall be securely covered with concrete, metal, or wood and shall be provided with adequate means of access.

The depth of the digestion chamber shall not be less than forty-two inches below the level of the liquid outflow. A space of at least twelve inches shall be provided above the level of liquid outflow, for scum formation and gas escape.

The inlet and outlet pipes shall be of a size not less than that of the sewer served and shall be so provided with baffle plates or with inverted sanitary tee-fittings as to prevent any excess turbulence or disturbance of the scum. The outlet baffle or tee-fitting shall extend not less than six inches above and fifteen inches below the water-line. The inlet tee-fitting or baffle shall extend several inches above and ten to fifteen inches below the water-level in the tank. The level of the outlet shall be two to four inches below that of the inlet.

6. *Dosing Chambers.*—Any septic tank or other sewage-disposal tank of more than four hundred gallon capacity and discharging into a sub-surface tile disposal-field or sand filter shall be provided with a dosing chamber of liquid capacity of at least one-tenth that of the treatment tank.

7. *Dosing Siphons.*—Dosing chambers shall be provided with siphons or other discharging devices and shall be automatic unless other means are provided for their proper operation. Such siphons or other discharging devices shall be made of corrosion-resistant material.

8. *Storm Water.*—Surface or storm water shall not be drained into any private sanitary sewage-disposal system.

9. *Capacity of Tile Disposal-field.*—In assessing the capacity of any private sub-surface irrigation field for sewage, consideration shall be given to the character of the soil and the capacity of the dosing chamber.

The length of open-joint tiling shall be not less than sixty lineal feet per dwelling in porous soils and shall be increased in proportion to the number of bedrooms in excess of two and not more than five at the minimum rate of eighteen lineal feet per bedroom.

For schools and similar establishments whose daily requirements are of limited duration, the length of open-joint tiling shall be not less than two hundred and sixty lineal feet.

The volume of the disposal tile and feeder pipes shall in no case be less than one hundred and twenty per cent. of the discharge volume of the dosing chamber.

10. *Tile Disposal-field in Impervious Soil.*—No sub-surface sewage irrigation field shall be constructed in clay or other heavy or impervious soil unless porous filtration media and adequate drainage are provided by removing such impervious soil and replacing it with porous filtering material, such as coarse sand, gravel, cinders, or broken stone, to a depth below the bottom of the disposal tile of not less than eighteen inches and preferably not less than twenty-four inches.

11. *Size of Open-joint Tile and Method of Laying.*—Ordinary field drainage tile of a size not less than four inches shall be used. They shall be laid on a firm base of broken stone, gravel, or on tile supports, and shall have a depth of cover not less than twelve inches nor greater than twenty-four inches. Open joints of one-eighth to three-eighths of an inch shall be left between tiles, and the upper half of such joints shall be covered by tarred paper, broken tile, or other approved protection. The tile trench shall be back-filled with coarse sand, gravel, cinders, or broken stone of particle size not greater than one-half inch in any dimension to a depth of six inches over the top and around the sides of the tile wherever the soil is less porous than coarse sand or
